### Noodle cooling cap

Do you hate waiting for your favourite hot noodles to cool down when they are right in front of you? Let's try this new noodles cooling hat!

To make this noodles cooling hat, you need a cap, an electric fan and two batteries. First, wash the cap if it is dirty. Then, sew the battery base onto the cap. Make sure it is sewed tightly. After that, tie the fan at the front of the cap. Put the batteries into the base. You can also some decorations onto the cap if you like. Lastly, make sure the batteries are put in the right position in the base.

This noodles cooling cap is useful. When you are eating hot noodles, you can turn it on and enjoy the yummy noodles immediately. Isn't it cool?
